

SAFETY TURTLE PASSED  
THE 2008 GOOD HOUSEKEEPING  
RESEARCH INSTITUTE TESTS

## Wireless for Maximum Safety

*A child opens the unlatched pool gate and an alarm sounds. Seconds count, but the parent in the house doesn't hear a thing. A neighbor does, but will he or she immediately come to help, or complain about the noise later?*

While other gate alarms sound at the gate, the Safety Turtle wireless system sounds in the house, so the caregiver hears it and can act promptly.

When you need a gate alarm that alerts you IMMEDIATELY, every time, you need the Safety Turtle Wireless Gate Alarm.

## Two Layers of Protection in One System

The new Safety Turtle Wireless Gate/Door alarm provides a second layer of protection to the Safety Turtle personal immersion alarm. Use on all wood or metal frame doors, pool fences and property fences. One safety Turtle Base Station receiver within 200 ft. [60 m.] works with any number of Turtle wristband, gate and door sensor-transmitters of the same color. Safety Turtle can even be connected to your home alarm system!

## Gate Alarm Models GA-101, GA-ML-101

The Safety Turtle Wireless Gate alarm helps keep children out of a fenced pool area or within a fenced property. The alarm sounds IMMEDIATELY at the Safety Turtle Base Station when a child opens the gate or if the gate is accidentally left open. The GA-101 model is readily mounted by the home owner on any wood, metal or glass fence type. The GA-ML-101 model mounts to brackets exactly aligned to the Magna Latch self-latch fastening hardware. The compact, waterproof GA-101/GA-ML-101 operates for 3 years on an included CR2032 coin cell battery. It has a top side bypass switch, hidden from view and out of a child's reach, that an adult presses to inhibit alarming.

## Door Alarm Model DA-101

The Safety Turtle Wireless Door alarm DA-101 mounts on any door or window. The alarm sounds IMMEDIATELY upon a child opening the door or if the door is accidentally left open. One Safety Turtle Base Station supports any number of Turtle wristband, gate and door sensor-transmitters of the same color. Immediate neighbors use different colors to avoid alarming each other. The compact DA-101 operates for 3 years on an included CR2032 coin cell battery. In addition to a bypass switch on the unit, the DA-101 has an external delay button, so an adult can pass in either direction without the alarm sounding.
